

SPACE/STTI TULSA SHOW '85!

See Satellite Television at Its Very Latest!
Tulsa Convention Center
Tulsa, Oklahoma
June 21-22-23, 1985

Join the Thousands of Others
Here To See the
Fantastic World of Satellite TVRO!

The strides made by this industry are phenomenal and, because the world's technologies have progressed so rapidly and thoroughly, **satellite television is now affordable!**

Make your plans now to attend the SPACE/STTI Tulsa Show '85! to see and learn what it's all about!

June 20th, the day before the Show opens, is **"set-up" day** for the exhibitors. If at all possible, plan to arrive in Tulsa on this day for much can be learned by watching the exhibitors setting up their systems and testing their units in our outdoor antenna display area.

SPACE/STTI Tulsa Show '85! is scheduled to be held at the Tulsa Convention Center in Tulsa, Oklahoma, June 21-22-23, 1985. There will be approximately 600 exhibit booths featuring the most up-to-date technology in satellite TVRO 1985 lines! In addition to the inside exhibit booths, there will be an estimated 250 operating satellite dishes in our outdoor antenna display area!

The full three days of seminars and exhibits cost you only \$40.00 (or \$30.00 **if you pre-register**). So make your plans now and **send in your registration today!** Remember, your spouse may attend all three days for an additional \$5!

See "Vital Statistics" on pages 14 and 15 for further details.

We'll look forward to meeting you in Tulsa in June for perhaps your first step into the exciting world of Satellite TVRO!

—SPACE/STTI—

ABOVE is an example of the many varieties of satellite dishes that are on the market today. It's part of a scene from one of our industry trade shows at which satellite TVRO enthusiasts and businessmen and women came from all over the world to learn and see the latest in satellite TV technology!

See Everything More Clearly

See for yourself how beautifully this Raydx™ antenna blends with the environment. Imagine how complimentary it is to the home setting.

Other splendid features of the Raydish™ include precision-formed aluminum extrusions and stainless steel hardware. The outstanding construction of this unique design assures you excellent performance and years of trouble-free satellite television entertainment. Quality and performance is what makes Raydx™ number one in satellite antennas.

Experience the Raydish.™
It's clearly unique.

Available in 10½', 8½' and Expandable 6'

SATELLITE SYSTEMS, LTD.

GROWTH OF PRIVATE SATELLITE TV SYSTEMS IN U.S. ASTOUNDING!

How many private satellite TVRO systems are there in the U.S.? In 1984 the satellite TVRO industry accomplished one of its major goals: the installation of its **one millionth** home satellite earth station.

Manufacturers and distributors of TVRO equipment have set their sights on **doubling** that figure in 1985!

Market surveys indicate that there are 40 million families eligible for direct broadcast TV or private satellite systems in America alone. As people learn about the fun, entertainment and educational possibilities of a private system, they become immediate prospects for sets of their own.

NOW is the time for you to get set for your share of this huge flow of equipment and money! Join the SPACE/STTI Tulsa Show '85! at the Tulsa Convention Center in Tulsa, Oklahoma, June 21-22-23, 1985. We'll see you there!

A MINIATURE SATELLITE

The hit of the last three STT Trade Shows has been the gold-plated satellite pin (exact size shown). It seemed as though everyone at the Show was wearing them.

The pin is a faithful reproduction of a three-meter parabolic satellite antenna on a polar mount. It's another exclusive by Mark Hill Designs and it can be worn by men as a tie tac or by the ladies as a pin on dress, sweater, or scarf. Order one or more today!

ANOTHER EXCLUSIVE BY MARK HILL DESIGNS

We've never compromised on quality. Why should you?

For over 50 years, Fanon Courier has set the highest standards of quality for communications equipment. Our new FANSAT satellite receivers follow this tradition to the letter—much to the satisfaction of every segment of your market.

Take our top-of-the-line FANSAT 3500, for example. It features battery powered (9 volt) infrared remote control with pulse width modulated circuitry. This puts your customers in command of all major front panel functions at a nominal range of 40 feet.

Using the tactile feedback keypad, they control channel up/down, audio 6.2, 6.8, variable and mute functions, as well as audio and video fine tuning, skew tuning and power on/off.

That's a convenience feature customers will appreciate. Now here are some performance features they deserve. Full push button design

including a 24-position push button channel selector with automatic polarity selector. Also, a button that quickly scans the full channel range, for efficient positioning of the antenna and location of satellites.

Another button changes antenna polarity from horizontal to vertical for WESTAR, SATCOM, GALAXY and other formats. FANSAT 3500 has a meter that continuously monitors transponder signal intensity...plus a weatherized Down Converter to convert input frequency from 3.7-4.2 GHZ to 70 MHZ IF. And its AFC

on/off switch aids tuning in signal when microwave interference exists.

There's more. Much more. And it all adds up to crystal clear, drift-free video reception on as many as 100 television channels worldwide.

This story of superior performance is repeated by the FANSAT 1500, featuring a 24-position detent channel selector with automatic polarity selector. And for budget-minded buyers, FANSAT 500 provides the best of the basic features—with video and audio quality to match.

Because of FANSAT's design it's as easy to make adjustments as it is to get the perfect picture. All servicing is done externally, without removing the top covers.

So make a profitable move. Stock the FANSAT receiver line now. And there's more to come. That's the payoff...when you offer quality without compromise.
